Setting up the keyboard chart

Activity

← Keyboard chart

1

Select the keyboard chart that is the correct size for your piano/keyboard. You will know which is the correct size because the lines on the chart will match the widths of the keys on your keyboard.

2

Find the Middle C Key on your piano/keyboard. Place the keyboard chart behind the keys of your piano/keyboard with the red Middle C circle behind the white Middle C key. This is the correct position for your keyboard chart. The keyboard chart letters match up with the white keys on your piano/keyboard. You will only use the white keys to play the songs in this book.

You are now ready to play your first song!
Turn the page to try Westminster Chimes.

Hot Cross Buns

Right hand plays the white keys that match up with these keyboard chart circles.

Put finger 1 (your thumb) on **C**, finger 2 on **D**, finger 3 on **E**, finger 4 on **F** and finger 5 on **G**. Always play with your right hand in this position unless the song tells you something different.

This is the first song for your right hand with all your fingers in their playing positions - Are you ready? Let's play!

Remember to play with curved fingers
